Please use this QR code to access important safety documentation posted on our School districts website.

The first document is our **ELECTRONIC MSDS-SDS FILES** Highlighted in yellow. In this tab you find a link to every item that requires a safety data sheet as recorded during our RTK survey. These sheets will provide the immediate first aid needed for treatment. All items are contained in folders in alphabetical order by the product trade name.

In this link you will also find all of our required safety plans and Lead in Water testing results.

This information can also be found on our district web-site in the Maintenance and Grounds section under the District tab. Follow the link to safety plans.

Please feel free to contact me with any question or concerns you may have in this matter.
